### **DETAILED ACTION**

Claims 1-20 are pending in this application.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on September 29, 2005; December 13, 2005 and March 22, 2007 was noted and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 13-16 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Applicant recites the phrase "Use of" in the claims.

Claims 13-16 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a specific asserted utility or a well established utility.

**For the purposes of examination claims 13-16, will be treated as method claims.**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-16 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 13-16 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: how to use the composition (i.e. how to apply it, etc.).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1616

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Uehara et al. (hereafter Uehara) (US 5,562,901).

Uehara discloses a composition comprising an activated carbon as an active agent, having particle size of 0.05 to 2 mm, which is usable internally for medicinal application (col. 2, lines 47-51). Column 6, lines 16-19 disclose various delivery carriers for the activated carbon particles.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sonobe et al. (hereafter Sonobe) (US 6,830,753).

Sonobe discloses in column 3, lines 37-39 a porous spherical carbonaceous substance having a diameter of 0.01 to 1 mm. Column 7, lines 34-49 disclose what diseases can be treated such as renal disease.

### ***Conclusion***

Claims 1-20 are rejected.
